# Environment Policy

## Our Environmental commitments are :-

- To use 95% Forest Stewardship Council certified timber on all projects.
- To provide zero carbon structures to all clients specifying that.
- To offer and wherever possible use environmentally friendly (water based) pressure treatments, stains, varnishes and paints.
- To promote the benefits of sustainable buildings and lifestyles.
- To promote and encourage the use of low energy lighting and supply low energy white goods.
- To provide dual flush toilets.
- To supply energy efficient condensing gas boilers & pressure hot water systems with timers, room and appliance thermostatic controls, all to minimise energy waste.
- To offer sedum roofs, any and all alternative energy systems such as; Photovoltaic's, Solar Thermal heating, wood-burning, environmentally friendly insulation products, ground-source heating and community heating schemes.

## Our general objectives are:

- To prevent or minimise pollution.
- To minimise waste.
- To conform to environmental legislation.
- To recycle materials and to use recycled materials or materials from quick renewing sources where possible.
- To maximise energy efficiency.
- To use recycled water where possible.
- To use the minimum of materials from natural resources and to specify such materials be derived from sustainable sources whenever possible.
- To use recycled materials where possible.
- To ensure on-site contractors working on our site or on our customers' sites on our behalf are aware of and follow our environmental policy.
- To encourage contractors and sub-contractors to improve their environmental performance.
- To have neutral or beneficial effect on local habitat and the environment.
