

beauty & style, naturally

School Assembly is Doubly Impressive

When Lingfield Notre Dame School decided it was time to invest in a new classroom building they wanted a change of direction from the traditional build style of the rest of the school, Rural Log Cabins helped them bring this exciting project to fruition.

Lingfield Notre Dame had an excellent idea of how to utilise some available woodland space within the school grounds. After a short period Rural Log Cabins offered a turnkey service that was then honed and developed in close conjunction with the school to achieve a double classroom block with a shared entrance area.

At Rural Log Cabins we believe the teaching and learning experience should be a pleasurable and relaxed one. We have extensive experience in providing high quality buildings with outstanding and innovative features for many different branches of the education industry, ranging from pre-school nurseries through to junior & senior schools.

Our core philosophy is that each building we design and construct is a one-off, built to the exact specifications of our

customer. Although we have a large database of existing design ideas which can be used as templates, we will always encourage our customers to start with a blank sheet of paper and explain to us precisely what they need and want from their project.

Work on the project began and Rural Log Cabins worked on-site during the normal school hours and without causing any significant impact on the normal routine of both staff and children, the entire structure was manufactured on-site, no prefabricated sections were used, although it is possible to use prefabrication if orders are placed with long lead times.

Complete on-site construction, no prefabricated sections.

The project was completed using timber from certified sustainable sources. Other supplies were sourced locally, thus keeping the environmental impact for the building to an absolute minimum.

The Facilities Manager at the School commented “**Rural Log Cabins have been really**

professional, the construction hasn’t really caused us any inconvenience at all and they have kept us informed of all the important day to day issues as the project has progressed, right up to the completion of our superb new classroom.”

The design incorporated many impressive features, each room is separately served by extremely efficient air heat pumps, the interior is all tongue-and-groove timber throughout with colour coordinated carpet tiles being used which allow easy replacement, should any damage occur due to routine wear and tear.

The whole project was completed on schedule and now Lingfield Notre Dame School has a stunning new double classroom cabin which is low carbon & sustainable.

At Rural Log Cabins we always make it our business to give our customers exactly what they are looking for.
